Janet enjoys eating cakes, chocolates and ice cream. The sweeter the food, the more she likes it.

"You can't eat too much sugary food," Janet's mother says angrily. She frowns and crosses her arms. She tells Janet that sugary food will cause tooth decay.

For breakfast that day, Janet has a big doughnut filled with jelly. She smiles and takes a big bite. She chews hard and then stops when her teeth begin to hurt. Janet cries out in pain.

Jane was going to celebrate her birthday and Peter was excited for her. He remembered what Jane had always wanted. He decided to get a doll for his sister with his savings from his piggy bank. That Friday afternoon, he skipped happily to a shopping centre down the street. He wanted to give his sister a birthday surprise the next day. The moment he bought the doll, he ran home as it was getting late.

The special day arrived. Jane invited all her friends and neighbours to her party. Jane's mother baked a strawberry cake for her. There were ten candles on it. Everyone at the party had lots of fun playing outdoor games. After that, they sang the birthday song. It was a wonderful birthday party.

It was Grandpa's birthday. He was eighty years old. Everyone in the family was busy as they were preparing to celebrate his birthday.

Section C: Comprehension (4 X 1mark)

Read the passage carefully and answer the following questions. Your answers must be based on the passage.

The giraffe is the tallest land animal. It can grow to a height of six metres tall. It has a pair of sharp eyes to help it sense danger from far. Other animals such as the zebras and deer often gather around the giraffe to stay away from danger.

Giraffes are found in open grasslands in Africa. They feed on leaves on the trees and can go without water for weeks. Giraffes get most of the water they need from the plants they eat. They take turns to eat and drink so that at least one giraffe in the herd helps to look out for predators. They are careful not to be caught by the lions.

Female giraffes in the herd help to take care of their calves. Before a lion can attack a calf, its mother will position herself over the calf to protect it. She will use her powerful front legs with sharp hooves to put an end to the lion's life.
